At Colorado Technical University Online, our courses are fully web-based. Students have the ability to log into their virtual classroom when it's convenient for them. Our students have access to their classroom 24 hours/7 days a week. Students are encouraged to participate in their online courses in an academically-related environment comparable to the minimum of one contact hour of instruction in a seven-day calendar week. This participation is monitored so that Student Success Coaches can track student course participation weekly and contact students who have fallen behind in course assignments. In order to support students in the first week of instruction of each session, courses are open to students two calendar days in advance of the first day of the session. A class related activity is defined as one of the following: submitted assignment, completed knowledge check, or participating in a graded online discussion board. After the first week, if a student does not participate in a class related activity at least once every 15 calendar days within a session he/she is administratively withdrawn from the University.
